

You gotta start somewhere, so we're starting here

We take our responsibilities seriously. We're determined to see Z having a game changing, leading or active position in four key sustainability areas. They are:

1

Using less and wasting less in our business

2

Reducing carbon intensity

3

Reducing reliance on fossil fuels

4

Supporting NZ businesses and communities

The table below outlines the sustainability goals from a 2012 baseline in each of the sustainability areas we have committed to. True to our value of being straight up, we track our progress against our sustainability goals and report on how we are tracking.

1. Use less waste less

Through our embedded operational processes we have reduced our energy demands and outgoing waste streams

Z uses 10% less electricity across the retail network

Z uses 50% less water in retail operations

Retail operation waste to landfill reduced by 70%

Z's head office is a Zero Waste operation because Z people understand the impacts of the waste we generate and play an active role to reduce it

2. Carbon intensity

In the way the we conduct our business and the support we have provided to our customers, we have reduced the carbon emissions of Z and our customers

The carbon footprint of Z's head office has been reduced by 25% and is held or reduced further for the next five years

In New Zealand, Z has reduced the distance it travels to deliver fuel buy an average of 15% for every litre of fuel delivered

Delivery emissions are reduced by 25% independent of the reduction of redundant kilometres

Z reduces the carbon footprint of our C-store operations by 10%

Z works with ten significant suppliers to reduce the carbon intensity of our activities together by 25%

With Z's help, customers have reduced their fuel consumption and been rewarded for their efficiency

3. Fossil fuel reduction

By working with other organisations, investing in new technologies, and researching and commercialising alternative fuels, Z has reduced New Zealand's reliance on fossil fuels

We are the leading New Zealand supplier of fuel products and services that minimise the environmental impact of our customers' businesses, including through:

Becoming New Zealand's leading biofuel supplier

Using more than 10% biodiesel in our business

Becoming the leading implementer of emergent transport energy in New Zealand

4. Support New Zealand

As a business, Z has demonstrated its commitment to New Zealand through its community programmes, sharing its skills and safety culture

Every Z employee is trained as a safety at home ambassador

Our safety performance is best in class and other New Zealand companies seek us out to improve their own safety performance

Z shares 365 skilled worker days with New Zealand every year

Z is recognised in New Zealand for developing the skills of our own team and the people we work with

Our neighbourhood investment continues to help people who need it in the communities we are connected to
